Ack! Eric is going to be doing this. Adding him and Eduardo here.

thank you!

Alicia

Good Morning Alicia!

Please let me know if the person you choose needs any historical knowledge about the instrument from last year :).

I hope you had a nice long weekend!
Breanna

Hi all,

Hope everyone enjoyed the long weekend and has their hot beverage of choice and blankets ready. Thank you for updating the [contact list](#) for this project. Based on the sheet, the lab survey will include the instruments listed in the table below. The contact listed for each program will be included in the closing/thank you component of the survey. Please let me know if you need to make any changes. **To keep the momentum going, please have your instrument drafts completed by end of day 3/7/2022.** If you happen to finish your section prior to this date, it would be great if you can let both myself and Erin know just in case everyone is super excited to get this done and it's finished early :) REDcap has been updated to include the list below. Reach out with any questions. Have a great week!

Hi all!

Looking forward to meeting on Monday to discuss the statewide lab survey! Sharing the email (below) that was sent to regional epi's so we are all on the same page. Here is the [folder](#) that houses the lab contacts list, a copy of the 2021 survey, and the 2021 final presentation (to refresh your memory if helpful).

The 2022 REDCap survey project has been created and those that edited the 2021 survey, [listed here](#), all have access. Let me know if others need to be added.

If you and/or your teams are able to take a look at the lab contacts list and provide any updates, that would be extremely helpful. This has also been shared with IDRP.

Let me know if you have any questions. See you on Monday, have a great weekend!

Hey all,

Hope everyone had a great week! The planning for this year's statewide lab survey has begun!

Survey Objectives

1. To collect information on clinical labs' testing practices for selected pathogens.
2. To assess changes in testing practices over time.
3. To document changes in clinical labs' testing practices to better understand the impact on surveillance and disease control.
4. To ensure contact information is accurate and up to date in order to effectively communicate and maintain relationships with statewide labs.

Your support is vital to the success of this project. We will discuss the project in more detail next week on the regional epi conference call but overall we will need your support...

- Prior to CDPHE sending out the survey...
 - Updating the [contact list](#) for labs within your region
 - Testing the survey and providing feedback
- Once the survey has been sent out...
 - contacting labs that have not completed the survey to see if support is needed/provide a reminder
 - providing updated contact information as you receive it

***Please provide updates to labs in your region within the [contact list](#) by 2/25/22. This will help to ensure we have testing, feedback, final updates complete and the survey can be sent out by March 15, 2022. We can discuss the timeline for other components on the regional epi call.

The folder that houses the lab contacts list, a copy of the 2021 survey, and the 2021 final presentation (to refresh your memory if helpful) is located [here](#).

THANK YOU ALL SO MUCH! Please reach out with any questions you have about the start of this project.

Per the [Regional Epi SOW](#):

Primary Activity 15: The Contractor shall administer a laboratory testing practices survey developed by CDPHE for the clinical laboratories within the Contractor's jurisdiction/region to assess testing.

Sub-Activity 15-1: The Contractor shall contact labs to complete the survey.

STANDARDS AND REQUIREMENTS:

17. CDPHE will provide the survey to be used for the Clinical Laboratory Survey by March 15, 2022.

DELIVERABLE:

12. The Contractor shall submit completed clinical laboratory surveys via electronically.

Completion dates: April 30, 2022
