Hi Eduardo,

Do you have someone on your team who could do a little matching between this list and CEDRS to see if any people on this list have developed COVID since the vaccine clinic on Nov 12 and 13? Request would be to do today or by Monday.

Let me know, please.

Thanks

Alicia

Hi Lindsey!

Alicia is working with staff to identify resources!

Happy Friday!  
Breanna

Hi! This is the list that we have of everyone who was vaccinated in Montrose at their clinic with the outbreak. I was hoping to compare this list with cases in CEDRS to see if anybody became a case after possibly being exposed at the clinic. Any help would be awesome!! If nobody has a chance today I can try to look at it early next week, but I think it should be a quick and easy analysis.

There were only 1,000 patients in CIIS for those two clinics when I ran the report, but I saw the higher number mentioned in the weekly COVID report today too. I just re-ran the report in CIIS, and the number is up to 1,779. Is this more in line with what you expected? Looks like there was a delay in entering all the doses into CIIS.

Attaching the more current list here.

Hi Heather - quick question. This data set has exactly 1000 people in it. I just wanted to double-check that this is correct and not a 1000-row cutoff in the report?

Thanks so much,  
Lindsey

Hi,

Attached is a line list of individuals vaccinated at the Montrose county vaccine clinic 11/12 and 11/13. Peak Family Medicine is the vaccine provider who actually administered the vaccine as Montrose County Public Health disenrolled from the COVID program in late June.

Please let me know if you have any questions or if we can support in any other way.

Best,  
Heather
